

## Introduction of Symposium Session II

### Hideki Takahashi (CFAI, Tohoku University)

Hideki Takahashi is Professor in Laboratory of Plant Pathology and Head of Division of Agricultural Immunology in International Education and Research Center for Food and Agricultural Immunology (CFAI), Graduate School of Agricultural Science, Tohoku University. He got his PhD degree from Tohoku University on molecular mechanism of symptom expression virus-infected plants in 1993 and studied on salicylic acid-mediated signaling pathway at Waksman Institute, Rutgers University, USA from 1994-1996 as a post-doctoral fellow. He is presently a council member of the Phytopathological Society of Japan. His research focuses NB-LRR class *R*-gene-conferred defense system against virus infection in host plants. Recently, he started to investigate the role of virus latent infection in plants on natural ecosystem in new research field: Neo-virology.
