

Greeting from Youth Program organizer

Kiyotaka Nakagawa

Center for Food and Agricultural Immunology (CFAI), Graduate School of Agricultural Science, Tohoku University
nkgw@m.tohoku.ac.jp

We feel “Doki Doki Waku Waku” —a term in Japanese for excited— to organize the Youth Program in Stage-2 New Horizons in Food Science via Agricultural Immunology. In the Youth Program, over 40 poster presentations from young researchers and academics about food safety and functional evaluation will be presented to participants, with an opportunity for questions and more in-depth discussion. In addition, we have invited famous guest speakers in this research field from around the world, so as to brighten the futures of young researchers and academics with inspiration and innovation. All of our staff would like you to know that we are prepared and looking forward to your participation. We hope to provide memorable experiences to you and work together with you to make this Youth Program a success.

Kiyotaka Nakagawa is now working as a Professor of Food & Biodynamic Chemistry Laboratory, Graduate School of Agricultural Science, Tohoku University. He is now also a Professor of International Education and Research Center for Food and Agricultural Immunology, Graduate School of Agricultural Science, Tohoku University. He is currently a Department Chair at Department of Applied Biological Chemistry,

Faculty of Agriculture, Tohoku University. He got his PhD in 1999. His present research focus on chemical structures, physiological significance and metabolism of food components and bioactive natural products, in order to explain their health effects on humans. In his laboratory, some novel molecules and functions of food constituents have been discovered, and new foodstuffs and products have been developed. Dr. Nakagawa serves now as Secretary General of Organizing Committee of IUNS-22nd International Congress of Nutrition in Tokyo, Japan 2021.
