

The Feature of Meeting by Smart Technology

Yukihiro Koizumi, Sumi Takuma, Shin Duckgyu, Kazuya Hanzawa, Yushi Kikuchi, Yoshinao Asakawa
RIEC, Tohoku Univ.

Background

Current meeting

- Place
- Member
- Device

Inconvenience

Solve with smart technology

Drawing into space

Writing text or inserting images into space by augmented reality will help us to share what we think.

With this technology, we can discuss even in an unsuitable place for meetings.

Join anywhere

The contents are shared via mobile network and easily accessible from any device. AI complements VR and AR so you can see and talk as if you were actually participating.

Makeover freely

Smart technology enables us to do over the room easily. We can customize the meeting room appropriately. Everything you want is ready to use by operating the device.

Feeding, Anywhere, Anytime

He powers his device by radio waves.

People can supply power to PCs and smartphones anytime, anywhere as long as radio waves are flying.

Conclude

- Augmented Reality(AR)
- Virtual Reality(VR)
- Artificial Intelligence(AI)
- Communication Technology

A human-centered meeting
that creates free ideas
