

TOHOKU
UNIVERSITY

The background features a large, glowing white spiral on a dark blue field. Scattered around the spiral are several green molecular models of varying sizes, some resembling quasicrystals. A large, stylized yellow flower is positioned in the lower-left quadrant, partially overlapping the spiral.

Creating a New Frontier through the Synergy of Quasicrystals and Strongly Correlated Electron Systems

June 2019

Interdisciplinary Symposium for Quasicrystals and Strongly Correlated Electron Systems
(June 23, 2019 – June 27, 2019)

Organizers

An-Pang Tsai (Tohoku University)

Marc de Boissieu (UGA, Grenoble INP)

Noriaki Sato (Nagoya University)

Sven Lidin (Lund University)

Tutorial Lecturers

Frank Steglich (Max Planck Institute for Chemical Physics of Solids, Germany)

Hiroyuki Takakura (Hokkaido University, Japan)

Alan Goldman (Iowa State University, USA)
