

# Community building discussion

Yasu Yamada

Kyushu Univ / Royal Holloway Univ of London

The theme of this program:

- to bring together physicists, geologists, biologists, and engineers with a shared goal of the understanding the Earth's interior and resolving the mysteries, and to build interdisciplinary community.

We saw several related projects / groups around us...

- Community building is mutually beneficial:
  - for the research
  - as it demonstrates endorsement and support from the interdisciplinary community to the individual projects / groups.
- We need a place (Forum) where we can get together / exchange ideas...

# How?

- Questionnaire after this event.
- Website (based on this event)
- Mail list (participants of this event)
- Meetings (in person, online)?
  - Regular / Non-regular?
  - Professional / Students + ECS?
  - Lectures / schools?
- External funding?
  - Each domestic ones? International ones (e.g. IGCP)?
- Supports from TFC? Some budget remains within FY2022.
- Other thoughts?
